

Incident Command

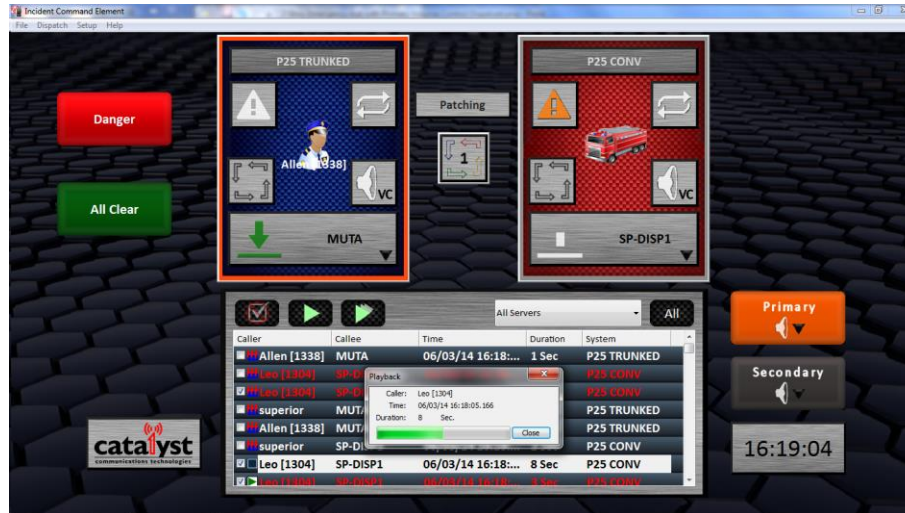

June 2014

Introducing Incident Commander Element (ICE)

ICE is an integrated solution for Talk Around voice communications. Up to four multi-band radios can be controlled from a single hardened laptop and patched in any combination for Project 25 (P25), EDACS, DMR and Conventional transmissions.

Scan Between

- 800 MHz
- 700 MHz
- UHF
- VHF
- Low Band

Integrated

- Instant Call Recorder
- Call History
- P25 Unit ID
- Emergency Signaling
- Alert Messages

ICE - Digital Vehicular Repeater Application

- ICE passes audio from Simplex Talk Around to the trunking system
- **ICE dynamically manages the flow of the audio so syllables are not lost**
- ICE records the voice locally (1 week's capacity)
- ICE stores call records for both talk around and trunked calls

M7300, M5300, & Unity Mobile

ICE uses an Intelligent Interface with

- Unit ID and alias
- Emergency
- Select any Group, Channel, or System
- Queued Call Message allows Catalyst to manage audio so syllables are not lost
- P25, EDACS and conventional
- And OpenSky Support with the M5300

HARRIS M7300
